The Design Guidelines are to assist in
achieving the desired character envisioned
for the hospital campus. Future facilities
should strive to blend old with new while
harmonizing with the surrounding neighborhood
landscape and building forms. Materials and
plantings should be

**FINAL Approved Design Guidelines 05-07-10 -
Seattle**

A hospital's interior design should be based on a comprehensive understanding of the facility's mission and its patient profile. The characteristics of the patient profile will determine the degree to which the interior design should address aging, loss of visual acuity, other physical and mental disabilities, and abusiveness.

Hospital | WBDG - Whole Building Design Guide
FGI Guidelines for Design and Construction of Health Care Facilities Created by the Facility Guidelines Institute, 2010 edition. There is a read only version of the guidelines at the bottom of the linked page.

FGI Guidelines for Design and Construction of Health Care ...

The Guidelines for Design and Construction of Hospital and Healthcare Facilities, 2010, formerly known as 'AIA Guidelines' was the origin of the 'infection control risk assessment' now required by multiple agencies. These Guidelines represent minimum US health care standards and provide guidance on best practices.

Current views of health care design and construction ...

The 2014 edition of the Facility Guidelines Institute's (FGI's) Guidelines for Design and Construction of Hospitals and Outpatient Facilities offers some notable changes from the 2010 edition with respect to imaging

services, and it is important for designers, engineers, facility and equipment planners to familiarize themselves with them.

Design standards for imaging areas are changing | HFM
