Studies have shown that effective discharge planning is one of the key factors related to the quality of inpatient care and unnecessary hospital readmission. The perception and understanding of hospital discharge by health professionals is important in developing effective discharge planning.

Barriers to effective discharge planning: a qualitative ...

So, qualitative researchers investigate meanings, interpretations, symbols, and the processes and relations of social life. What this type of research produces is descriptive data that the researcher must then interpret using rigorous and systematic methods of transcribing, coding, and analysis of trends and themes.

Qualitative Research Definition and Methods

B - Control and experimental group subjects are used in experimental, quantitative, and not in qualitative studies. C - Primary data sources are those gathered directly from the study subjects and can either be from direct interviews or from diaries or other documents written by the subjects.

Qualitative Research Exam Flashcards | Quizlet

Qualitative research is multimethod in focus, involving an interpretive, naturalistic approach to its subject matter. This means that qualitative researchers study things in their natural settings, attempting to make sense of, or interpret, phenomena in terms of the meanings people bring to them. Denzin and Lincoln (1994, p. 2)

Qualitative vs Quantitative Research | Simply Psychology

Qualitative research is a scientific method of observation to gather non-numerical data. This type of research "refers to the meanings, concepts, definitions, characteristics, metaphors, symbols, and description of things" and not to their "counts or measures". This research answers why and how a certain phenomenon may occur rather than how often.

Qualitative research - Wikipedia

In the context of medical and health research, qualitative studies may seek to investigate phenomena from the perspective of stakeholders, such as individuals or communities affected by health, illness, or health services, or the professionals who provide those health services.
