The Acer Aspire 5517, as well as some other Acer laptops, is really a poorly made computer. I have one and it's just about impossible to get to the fan to clean it when it overheats. Every other laptop I've had you just access the fan from opening the bottom. With this stupid Acer, you have to take the whole computer apart.

For an Aspire 5517 I just upgraded bios to 1.11 from 1.09 and installed a TL56 (1.8 GHz Dual core). No good. Won't boot at all. Went back to TL20 and works fine (1.6 GHz), but slow. Does Acer provide quality support with an approved CPU upgrade list for their laptops?
