Exhaust gas recirculation system (EGR) - Volvo Spare Parts ...

I have a 2000 model (old shape) volvo v70 with the AEL engine (called D5252t) running a MSA15.8 ecu. I removed the vacuum pipe to the egr and blocked it but this has threw a code. This engine has no sensor on the EGR itself being a conventional vacuum operated type, and I can see no flow sensors or otherwise in the inlet manifold, not can I see any reference to this in the wiring diagram.
