Evidence-based education - Wikipedia

Evidence-based training methods are practices grounded in and supported by research demonstrating their success. Using techniques and tools supported by research helps ensure effective training and also helps obtain executive buy-in for investing in such training programs.

Evidence-Based Training - Training Industry

I wrote the first edition of Evidence-Based Training Methods because there is a large repository of reports from research scientists in the academic literature. I believed then and today that much of this evidence remains unknown to practitioners. The academic research professionals and work-force learning practitioners constitute two quite separate communities of practice. There is little ...

EVIDENCE-BASED

It's always a good idea to use training methods that are (1) based in evidence and proven to be effective and (2) focused on improving performance on the job. Dr. Will Thalheimer is one of the leading research experts on evidence-based and performance-focused training methods, and he's been kind enough to grant us an interview that we'll ...
