2nd Semester Exam Study Guide - Quia

The second stage is when the Calvin Cycle takes place. In this stage, carbon dioxide and water get converted to organic materials like glucose. These reactions are called dark reactions which confuses people, but they do not take place at night. The short explanation of the Calvin Cycle is that it begins with carbon fixation.

2nd Semester Articles - BIOLOGY JUNCTION

To complete the degree, students must take 23 additional hours, including 9 hours in experimental techniques and data analyses and the biological sciences selectives/electives to meet concentration requirements (23 hours for General Biology). At least 9 of these 23 hours must be taken at the 300 to 400 level (excluding BIOS 391).

BS with a Major in Biological Sciences|General Biology ...

Education Information. General biology degree programs are offered at the undergraduate and graduate levels. They are aimed at students who either want to study all areas of biology or who do not want to commit to one area of specialization for their careers. Students receive foundational knowledge in molecular biology, biochemistry and genomics.

Following is a suggested course sequence for your program.Courses may be offered as indicated and/or at other times.

Suggested Course Sequence | Undergraduate Catalog

The Calvin Cycle occurs during photosynthesis and consists of light independent redox reactions that convert carbon dioxide into glucose. This conversion happens in the chloroplast, or more specifically the stroma of the chloroplast. The chloroplast region is an area between the thylakoid membrane and the inner membrane of the organelle which is typically located in the leaves of plants.
