### King Crabs Of The World

Alaskans who pick up Brad Stevens ' book, King Crabs of the World, are likely to browse through its pages looking for answers to the question: " Whatever happened to the king crab? ".If they make it to page 589, readers will be disappointed to hear editor Stevens ' say, " ....We will never know what caused the dramatic changes in the abundance of Bering Sea RKC after 1978 " .

### Tholepin: King Crab Decline Examined

King crabs are a taxon of crab-like decapod crustaceans chiefly found in cold seas. Because of their large size and the taste of their meat, many species are widely caught and sold as food, the most common being the red king crab (*Paralithodes camtschaticus*). King crabs are generally thought to be derived from hermit crab-like ancestors within the Paguridae, which may explain the asymmetry ...

### King crab - Wikipedia

The red king crab is the largest species of king crab. Red king crabs can reach a carapace width of up to 28 cm (11 in), a leg span of 1.8 m (5.9 ft), and a weight of 12.7 kg (28 lb). Males grow larger than females. Today red king crabs infrequently surpass 17 cm (7 in) in carapace width and the average male landed in the Bering Sea weighs 2.9 kg (6.4 lb).
