Grade 11 Math Tutor, Help and Practice Online | StudyPug

From the instantaneous position $r = r(t)$, instantaneous meaning an instant value of time t , the instantaneous velocity $v = v(t)$ and acceleration $a = a(t)$ have the general, coordinate-independent definitions; $v = \frac{dr}{dt}$, $a = \frac{dv}{dt}$. Notice that velocity always points in the direction of motion, in other words for a curved path it is the tangent vector. Loosely speaking, first order derivatives are related to ...

Equations of motion - Wikipedia

We are talking about the trigonometric identities in particular the Pythagorean identities for (\tan) and (\cot) of (θ) , and (\sec) and (\csc) . Here we are being asked to prove the identity $(\csc^2 \theta = 1 + \cot^2 \theta)$.
