expression is. These are most basically characterized as theories of reference and/or semantic theories. Second, there are also foundational theories of meaning, which are concerned with how the linguistic expressions came to have their semantic values.

Meaning: Foundational and Semantic Theories - Oxford Handbooks

Semantics is the linguistic and philosophical study of meaning in language, programming languages, formal logic, and semiotics. It is concerned with the relationship between signifiers—like words, phrases, signs, and symbols—and what they stand for in reality, their denotation. In the international scientific vocabulary semantics is also called semasiology. The word semantics was first used by Michel Br é al, a French philologist. It denotes a range of ideas—from the popular to the ...

Semantics - Wikipedia
The truth-conditional theory in semantics attempts to explain the logical meaning of sentences, treating a sentence as a logical proposition or basic statement which can be either true or false. It holds that if we know the conditions under which a particular sentence is true, we can infer the truth of related proportions.

Study On Theories In Semantics English Language Essay

There are countless theories of meaning – almost as many as there are linguists; they are mainly of two types: 1. Semantic theories, which assign semantic contents to expressions of a language (propositions); and 2. Foundational theories of meaning, which enquire into why expressions have the semantic contents that they
