Recreational drug use is the use of a psychoactive drug to induce an altered state of consciousness for pleasure, by modifying the perceptions, feelings, and emotions of the user. When a psychoactive drug enters the user's body, it induces an intoxicating effect. Generally, recreational drugs are in three categories: depressants (drugs that induce a feeling of relaxation and calm); stimulants ...

Vision. The Drug Policy Alliance envisions a just society in which the use and regulation of drugs are grounded in science, compassion, health and human rights, in which people are no longer punished for what they put into their own bodies but only for crimes committed against others, and in which the fears, prejudices and punitive prohibitions of today are no more.

About Us | Drug Policy Alliance

Gateway Drug Theory. Gateway drugs are substances that, when consumed, give way to harder, more dangerous drugs. These milder substances, such as nicotine or alcohol, are believed to open the door to drugs such as meth, heroin and cocaine, which can lead to addiction.. Marijuana, alcohol, nicotine and other gateway drugs boost dopamine levels, which increases pleasure.

What Is a Gateway Drug? (Marijuana, Alcohol & Other Drugs)

Our new report on fentanyl highlights the dangers of policymaking based on renewed drug war hysteria. Ramping up sentences for fentanyl will only compound the harms of illicit fentanyl use and undermine recent federal progress on sentencing reform.
